

Gain access to the **training content** you need to develop your workforce.

The Advanced Safety Orientation for Construction Industry program is a powerful industry tool that focuses on risks and precautions common to construction sites and construction-related job activities. It may be difficult to create an effective training program that suits your budget while instilling a solid foundation within newly recruited construction workers who require hazard recognition skills.

Our partnership with OpenSesame enables you to run a full training program without the hassle of managing multiple systems or suppliers.

Choose from top tier **Advanced Safety Orientation courses** to help boost your team's skills
